STEPHANIE SU

stephsu@berkeley.edu stephsu.me steph-su stephaniefenhua

Experience

Meta, *Software Engineer II* Aug 2025 – Present

- Owned pipeline **expanding AI training dataset by 20%** by removing artifacts from 3M Instagram uploads/week
- Increased Reels translation reliability from 95 to 99% by migrating tightly coupled features to a layered upload
- Built iOS tool to simulate upload API failures, uncovering unclear failure UX and prompting new retry policy
- Developed RL tasks and red-teamed Muse to identify safety vulnerabilities and evaluate post-training behavior

Datadog, *Software Engineer Intern* Sep 2024 – Dec 2024

- **Reduced service load by 80%** by identifying and excluding noisy events from processing using Python and Go
- Enabled faulty database change detection by building a Go pipeline to process events from a Kafka stream
- Improved service reliability by creating Terraform monitors to notify on-calls of increased latency and errors

Instagram, *Software Engineer Intern* May 2024 – Aug 2024

- **Increased annual revenue by $4M** and **reduced ads loading time by 70%** by optimizing image API payload size
- Enabled engineers to generate and compare images with up to 15 custom quality settings with React, PHP
- Identified out-of-memory errors for webp images by A/B testing image formats, leading to a fix in production

Figma, *Software Engineer Intern* Jan 2024 – Apr 2024

- **Amassed 2M weekly views** by building React detail pages to showcase all 300K Community resources
- Enabled blocking of low-quality resources from Google search results using Typescript, Ruby, PostgreSQL

Snapchat, *Software Engineer Intern* May 2023 – Aug 2023

- **Increased yearly active users by 80K** by streamlining user registration flow from SMS friend invites using Go
- Developed low-latency contact ranking based on # of friends on the app to increase conversion of SMS invites

Meta, *Software Engineer Intern* May 2022 – Aug 2022

- **Saved 6 engineering weeks per year** by building a debugging tool with PHP and React to replace six outdated tools and automate a 25-step process for finding the root cause of a demonetized video

Intel, *Contract Software Engineer* Feb 2022 – May 2022

- **Reduced competitive intelligence time by 95%** by building a financial dashboard that automates the scraping, visualization, and analysis of data from 250 competitor quarterly reports using Python, Plotly Dash, and pandas

Superposition, *Executive Director (Women in STEM org)* Jul 2018 – Feb 2024

- Spearheaded expansion to 120 chapters in 25 countries in two years by building chapter program from scratch
- Organized Bay Area's largest all-women hackathon four times for 1000 total hackers at Uber and VSCO HQ

Education

B.A. Computer Science, *University of California, Berkeley* May 2025 | GPA 3.81

- **Classes:** Data Structures, Data Science, Discrete Math, Algorithms, Operating Systems, Security, Networking
- **Awards:** Neo Scholar, Kleiner Perkins Fellow, Accel Scholar, Regents' Scholar, UPE (CS Honors)
- **Involvements:** Cal Hacks, Voyager Consulting, Rewriting the Code (RTC), Society of Women Engineers (SWE)

Skills

Backend (Python, Go, PHP, Java, C), iOS (Swift, Obj-C), Web (HTML/CSS, JavaScript/TypeScript, React), SQL
